All cosmetic products manufactured by **Dana Italia s.r.l.** comply with the Good Manufacturing Practice (GMP) conformity with EU regulation 1223/2009 of the European Parliament and of the Council of 30 November 2009 on Cosmetic Products. As an example of manufacturing process, we report a part of Batch card, with instruction for operators.

OPERATIVE PROCESS

Clean the kettle and all other mixer or flask that will be used for production, according to clearing procedure. Weight off raw materials. Proceed with methodic as described in approved batch card.

Manufacturer of depilatory waxes intended for professional use on the basis of checks carried out during the of production and business management.

PHASE A

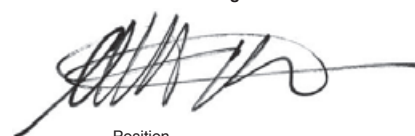

INGREDIENTS	%	QUANTITY KG	LOT #	CHECK
SACCHARUM OFFICINARUM POWDER				<input type="checkbox"/>
MEL (HONEY)				<input type="checkbox"/>
GLUCOSE				<input type="checkbox"/>
DEXTRAN, AQUA				<input type="checkbox"/>
DEXTRIN				<input type="checkbox"/>
CYAMOPSIS TETRAGONOLOBA GUM				<input type="checkbox"/>
LACTIC ACID				<input type="checkbox"/>
C.I. 75810				<input type="checkbox"/>

PHASE A

Weigh out all ingredients of phase A and put them into the kettle. Heat until temperature has reached 110° - 115 °C. Start to mix. If the product is completely clear, and you'll start filling the cassettes, make sure the product is between 85° - 90°C.

For a good testing procedure, is important that the mix reach a good equilibrium of chemical, physical and viscosity features; for this reason , wait 3 hours before testing product, during this period , hold product at a temperature around 85°C under stirring. After this period, start with test on bulk, following the QC protocol, approved from company. If the batch pass all tests, proceed with packaging.

PRODUCT NAME

METALLIC POT
CERA IDROSOLUBILE 2.2 CLOROFILLA 500 ml

The objective of this stability report is to ensure that product maintains its intended physical, chemical and microbiological quality, as well as functionally and aesthetically when stored under appropriate conditions. The features and the results of study protocol are specified in document relative to "Physical, Chemical and Microbiological Specifics".

STABILITY

This product doesn't contain water, so is highly not probable the microbiological contamination; other substances used as ingredients have all a very high chemical stability and are resistant to oxidation by oxygen contained in atmospheric air; hygroscopic ingredients are not present, for this reason is not possible the presence of water coming from atmosphere. This product can be defined stable and without modification, for three years if stored under appropriate condition and in the original packaging, without opening. This product can be defined stable and without modification, for three years if stored under appropriate condition and in the original packaging, without opening.

STABILITY TEST

This product passed all stability tests, performed in the factory, according to internal test protocol. During tests, the products are put under conditions that can accelerate all phenomena of instability. At the end of stability tests the product is evaluated for the potential interactions between product and the packaging that might occur during Thermo-Shock Test. This product can be defined stable and without modification, for three years if stored under appropriate condition and in the original packaging, without opening.

HEAT-SHOCK TEST

The aim of this test is to accelerate, to the maximum possible, the phenomena of "aging" of cosmetic product, for discovering any instability in a short time. Product, in its final packaging, has been stored at room temperature for 24 hours, after, it has been stored at -10°C for 24 hours, after, put in professional heater for cartridges of depilatory waxes for 24 hours; at the end, stored at room temperature after this Heat-Shock Cycle, all eventual modifications have been evaluated and compared with a sample, stored always at room temperature and considered as the referring sample. The Heat-shock Test is repeated on the same sample for three cycles.

COMPATIBILITY CONTENT/BOX

After Heat Shock Cycle have been evaluated all phenomena on packaging such as:

- increased weakness
- broken areas
- deformations
- change of color and transparency
- change of permeability
- loss of product
- problems with product exit
- label deformation or lowering of coloration
- blockage of opening system
- color transfer from product to packaging

Conclusion: this product, under all stability simulations, doesn't show any change that induced to change formulation or packaging or labeling or production cycle. It is stable when stored and handled under appropriate conditions. PAO IS 12 MONTHS.

La Cera Idrosolubile Depilia, disponibile in diverse varianti, è ideale per le pelli più sensibili e delicate, grazie alla sua pregiata composizione completamente naturale. Rappresenta una valida alternativa alle cere tradizionali, non aggressive la pelle e si rimuove con un semplice risciacquo. Appartiene all'ultima generazione di prodotti depilatori le cui caratteristiche principali sono bassa temperatura, praticità, igiene ed efficacia.

● Depilia Hydrosoluble Wax, available in different variants, is ideal for the most sensitive skins, thanks to its valuable all-natural composition. It represents a valid alternative to the traditional wax, does not attack the skin and can be removed by a simple rinse. The next generation of depilatory products whose main characteristics are low temperature, practical, hygiene and efficiency.

● After heated the Depilia Hydrosoluble Wax with the appropriated wax heater, spread a thin layer of product on the area to depilate in the direction of the hair growth using a spatula.

● Apply a non-woven strip on the layer of wax adhering with light pressure, holding with the palm of your hand, pull the strip in the opposite direction of the hair growth.

INGREDIENTS
INCI (CTFA): Saccharum Officinarum Powder, Mel [(Mell)honey], Glucose, Stearic Acid (Water), Dextrin, Cyamopsis Tetragonoloba Gum [Cyamopsis Tetragonoloba (Guar) Gum], Lactic Acid, C.I. 75810

CERA DEPILATORIA IDROSOLUBILE
HYDROSOLUBLE DEPILATORY WAX
CERA DEPILATORIA IDROSOLUBLE
CLOROFILLA / CHLOROPHYLL / CLOROFILA

ISTRUZIONI PER L'USO
Dopo aver riscaldato la cera idrosolubile Depilia con apposito scaldacera, stendere con una spatola un sottile strato di prodotto sulla zona da depilare nella direzione di crescita del pelo. Applicare una striscia di tessuto non tessuto sullo strato di cera facendola aderire con una leggera pressione, aiutandosi con il palmo della mano e tirare la striscia contropelo. Rimuovere gli eventuali residui di cera con acqua.

INSTRUCTIONS FOR USE
La cera idrosolubile Depilia, disponibile in differenti varianti, es ideale para las pieles más sensibles, gracias a su valiosa composición totalmente natural. Esto representa una alternativa válida a la cera tradicional, no ataca la piel y se retira con un simple enjuague. Pertenecia a la nueva generación de productos depilatorios, cuyas características principales son la baja temperatura, practicidad, higiene y eficiencia.

INSTRUCCIONES DE USO
Después de calentar la cera idrosoluble Depilia con un especial calentador de cera, extender con una espátula una capa fino de producto sobre la zona que se desea depilar en la dirección del crecimiento del pelo. Aplicar una tira de TNT sobre la capa de cera, haciendo adherir con una ligera presión. Con la ayuda de la palma de la mano, tire la tira de TNT contropelo. Eliminar cualquier residuo de cera con agua.
