All cosmetic products manufactured by **Dana Italia s.r.l.** comply with the Good Manufacturing Practice (GMP) conformity with EU regulation 1223/2009 of the European Parliament and of the Council of 30 November 2009 on Cosmetic Products. As an example of manufacturing process, we report a part of Batch card, with instruction for operators.

OPERATIVE PROCESS

Clean the kettle and all other mixer or flask that will be used for production, according to clearing procedure. Weight off raw materials. Proceed with methodic as described in approved batch card.

Manufacturer of depilatory waxes intended for professional use on the basis of checks carried out during the of production and business management.

PHASE A

INGREDIENTS	%	QUANTITY KG	LOT #	CHECK
COLOPHONIUM				<input type="checkbox"/>
GLYCERYL ROSINATE				<input type="checkbox"/>
ETHYLENE/VA COPOLYMER				<input type="checkbox"/>
PARAFFIN				<input type="checkbox"/>
HYDROGENATED COCONUT OIL				<input type="checkbox"/>
GLYCERIN				<input type="checkbox"/>
C.I. 77499				<input type="checkbox"/>

PHASE A

Weigh out all ingredients of phase A and put them into the kettle. Heat until temperature has reached 110° - 115 °C. Start to mix. If the product is completely clear, and you'll start filling the cassettes, make sure the product is between 85° - 90°C.

For a good testing procedure, is important that the mix reach a good equilibrium of chemical, physical and viscosity features; for this reason , wait 3 hours before testing product, during this period , hold product at a temperature around 85°C under stirring. After this period, start with test on bulk, following the QC protocol, approved from company. If the batch pass all tests, proceed with packaging.

PRODUCT NAME

METALLIC POT
BRAZILIAN BLACK FILMWAX 400 ml

The objective of this stability report is to ensure that product maintains its intended physical, chemical and microbiological quality, as well as functionality and aesthetics when stored under appropriate conditions. The features and the results of the study protocol are specified in the document relative to "Physical, Chemical and Microbiological Specifics".

STABILITY

This product doesn't contain water, so it is highly not probable that microbiological contamination; other substances used as ingredients have all a very high chemical stability and are resistant to oxidation by oxygen contained in atmospheric air; hygroscopic ingredients are not present, for this reason it is not possible that the presence of water coming from the atmosphere. This product can be defined stable and without modification, for three years if stored under appropriate conditions and in the original packaging, without opening. This product can be defined stable and without modification, for three years if stored under appropriate conditions and in the original packaging, without opening.

STABILITY TEST

This product passed all stability tests, performed in the factory, according to the internal test protocol. During tests, the products are put under conditions that can accelerate all phenomena of instability. At the end of stability tests, the product is evaluated for the potential interactions between product and the packaging that might occur during Thermo-Shock Test. This product can be defined stable and without modification, for three years if stored under appropriate conditions and in the original packaging, without opening.

HEAT-SHOCK TEST

The aim of this test is to accelerate, as much as possible, the phenomena of "aging" of the cosmetic product, for discovering any instability in a short time. Product, in its final packaging, has been stored at room temperature for 24 hours, after, it has been stored at -10°C for 24 hours, after, put in a professional heater for cartridges of depilatory waxes for 24 hours; at the end, stored at room temperature after this Heat-Shock Cycle, all eventual modifications have been evaluated and compared with a sample, stored always at room temperature and considered as the referring sample. The Heat-shock Test is repeated on the same sample for three cycles.

COMPATIBILITY CONTENT/BOX

After the Heat Shock Cycle, all phenomena on packaging such as:

- increased weakness
- broken areas
- deformations
- change of color and transparency
- change of permeability
- loss of product
- problems with product exit
- label deformation or lowering of coloration
- blockage of opening system
- color transfer from product to packaging

Conclusion: this product, under all stability simulations, doesn't show any change that induced to change formulation or packaging or labeling or production cycle. It is stable when stored and handled under appropriate conditions. PAO IS 24 MONTHS.

depilab®

GIFTBOX PRINT ARTWORK

La cera depilatoria BRAZILIAN BLACK FILMWAX è il sistema più innovativo ed efficace per una depilazione duratura, indolore ed altamente professionale. Grazie alla sua composizione con resine naturali pregiate, è un prodotto dalle spiccate proprietà demoproiettive.

BRAZILIAN BLACK FILMWAX depilatory wax is the most innovative and effective system for long lasting, painless, and highly professional hair removal. Thanks to its composition with high-quality natural resins, it is a product with strong demoprojective properties.

INGREDIENTS
INCI (CTFA): Colophonium, Glyceril Rosinate, Ethylene/Va Copolymer, Parafin, Cera Alba (Beeswax), Hydrogenated Coconut Oil, Glycerin, CI. 77499 (Iron Oxides).

Prodotto da:
Dana Italia S.r.l.

USO PROFESSIONALE
PROFESSIONAL USE

brazilian black filmwax
cera depilatoria senza strisce
no strips depilatory wax
bi-direzionale/extra flessibile
bi-directional/extra flexible
400ml e fl.oz.13,53
made in italy

100% ORIGINAL FORMULA

ISTRUZIONI PER L'USO
Dopo aver riscaldato il prodotto, verificare la temperatura per evitare eventuali scottature. Quando la cera raggiungerà la giusta consistenza, stendere con una spatola un sufficiente strato di prodotto in qualsiasi direzione, lasciare raffreddare per solidificare la cera e successivamente partendo dal basso, sollevare un piccolo lembo dello strato di cera e continuare con uno strappo deciso. Per un trattamento ottimale, aiutandosi con l'altra mano, si consiglia di tirare la pelle in direzione opposta allo strappo.
Rimuovere gli eventuali residui di cera con il Lipo Remover Depilab.
AVVERTENZE: non esporre il prodotto a fonti di calore a fiamma viva o corpo incandescente.

INSTRUCTION FOR USE
After heating the product, check the temperature to avoid any burns. When the wax reaches the right texture, lay with a spatula a sufficient layer of product in any direction, let it cool to solidify the wax and then from the bottom, lift a small flap of the wax layer and continue with a firm tear. For optimal treatment, helping with the other hand, it is recommended to pull the skin in the opposite direction to tearing.
Remove any wax residues with the Depilab Lipo Remover.
WARNINGS: do not expose this product to flame-retardant heat or incandescent body.

Prodotto cosmetico, solo uso esterno, tenere lontano dalla portata dei bambini.
Cosmetic product, external use only. Keep away from children.
